## Scatter Plots and Lines of Best Fit Worksheet

1. MUSIC The scatter plot shows the number of $C D s$ (in millions) that were sold from 1999 to 2005. If the trend continued, about how many CDs were sold in 2006?

2. FAMILY The table below shows the predicted annual cost for a middle income family to raise a child from birth until adulthood. Draw a scatter plot and describe what relationship exists within the data.

| Cost of Raising a Child Born in 2003 |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Child's <br> Age | 3 | 6 | 9 | 12 | 15 |
| Annual <br> Cost (\$) | 10,700 | 11,700 | 12,600 | 15,000 | 16,700 |

3. Make a scatter plot of the data in the table. Draw a line of best fit. What is the equation of the line of best fit?

| X | -2 | -2 | -1 | 0 | 1 | 1 | 1 | 2 | 2 | 3 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| y | 2 | 3 | 2 | 1 | 0 | 1 | -1 | -1 | -2 | -2 |

4. EDUCATION The table at the right gives the number of hours spent studying for a

| Study Hours | 3 | 2 | 5 | 1 | 0 | 4 | 3 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grade | 84 | 77 | 92 | 70 | 60 | 90 | 75 | science exam and the final exam grade.

a. Draw a scatter plot of the data and draw in the line of best fit.
b. What is the equation for the line of best fit?
c. Predict the grade for a student who studied for 6 hours.
d. Could this line go on forever? Why or why not?

5. BASEBALL The scatter plot shows the average price of a major-league baseball ticket from 1997 to 2006.
a. Use the points $(2001,17.60)$ and $(2002,18.75)$ to write the slope-intercept form of equation for the line of fit shown in the scatter plot.
b. Use your equation to tell the price of a ticket in 2009. Is this extrapolation or interpolation?

| U.S. Foodborne Botulism Cases |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Year | 2001 | 2002 | 2003 | 2004 | 2005 |
| Cases | 39 | 28 | 20 | 16 | 18 |

## U.S. Foodborne Botulism Cases

7. ZOOS The table shows the average and maximum longevity of various animals in captivity.
a. Draw a scatter plot and determine, what relationship, if any, exists in the data.

| Longevity (years) |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Avg. | 12 | 25 | 15 | 8 | 35 | 40 | 41 | 20 |
| Max. | 47 | 50 | 40 | 20 | 70 | 77 | 61 | 54 |

 longevity of 33 years. Is this an example of Extrapolation or Interpolation?
